Warhammer 40k: Darktide

STEAM

ID: 765611981474831

Negative

Bought this game near release and played for a little bit but quickly grew sick of it due to the many bugs and crashes and the shocking lack of depth, as the game has developed it has fixed a few of its issues but it still is a shockingly unstable game that crashes at the most annoying times. There is fun to be had but there is also a lot of frustration.

status on Jan 21, 2023 = waste your times and you should avoid this half bake product from broken oven. status on Jan 25, 2023 = open letter of blah blah blah, still waste your times, FS only bark not bite. Status on Feb 1, 2023 = After free from mutant by random nice guy, i fall under the ground to death. Why this piece of sh.it bug still here ? Feb 2 or 3, 2023 actually it doesn't matter, Fatshark try to persuade with nice word about update on balance / crafting / etc blah blah blah Only time will tell this will be another big empty words like past month or not ? Feb 22, 2023 Major update, this should be on the launching not half bake in the previous few months ago Better but still have a few bugs, time will tell that FS will improve or waste your time And look back at the time period in the past look like. Got a problem >>> FS don't care, take a long vacation >>> after long vacation just start to work when customer complain out loud >>> after 2 or 3 months maybe some improve or fixed ? April 2024 after looking for news update i regret that i should uninstall earlier Jun 2024 only around 3.5-5k left playing.....even the Big E can't call back those who has become faithless..... Abadon destroy Cadia by using black stone fortress as a bullet, FS can ruin and destroy 40k by a single bullet call Darktides....yeah it will not kill as soon as it hit but as a time pass it will lying many sweet big fat lie about fun, improvement, new class, quality of life blah blah blah like slaneesh whispering but at the end only ruin and decay of nurgle await you. 27 Sep 2024 Lock and load first look is good,....nah compare what what we got before) and again they try to suck our time to spent more and more for grinding to build a good items, to be fair yeah this is better than the previous but meh what took you so long ? And new items now are shitty until you get level 15+ for each type of weapon, you can imagine how many hours to invest on grinding ? so this game still suck but less than previous version, if you had enough time for grinding yeah go on it except you didn't better avoid it and skill rework.....well i don't want to say something like this but.....nah during launching half bake i feel stonker than present patch.

Wildfrost

STEAM

ID: 7656119810987576

Positive

Beneath the really cute visuals this game hides a wonderful balance of strategic and tactical elements. I thought nothing would come close to Slay the Spire but this just does the trick for me.

Final Fantasy 14

r/ffxiv

Negative

Not really. All the local competitors are largely relying on the 2015 policy to be comparable to Comcast. Without it, they go back to being "hey, we have slower net, but at least we aren't Comcast." Between snail slow internet (local) and awful customer service (Comcast), guess what most people pick? Esp. if they're gamers or upload/download enormous file sizes (many scientists, like myself)?

Sea of Thieves ID: 765611990969141 Positive Very fun and interesting game, the mechanics are interesting and allow you to improve but are not to complex. My only personal gripe about it is that it's much more fun with friends then it is solo, but when played with friends it's one of the most fun games ever. Sea of Thieves ID: 7656119804458374 Negative Devs dont care about this game. they make changes that dont improve it. its a multiplayer game that actively discourages combat. Overdosing on vitamins is more exciting than this game. Votes Up: 0 Funny Votes: 0 Weighted Score: 0.48 Updated: 15/01/2023

Same as Fallout 4 only open world. Has been glitchy in the past but seems more stable now. Thoroughly enjoyable game.
